

HM108 : Hospital Visits

1. Objectives :

To provide comparative understanding of various kinds of hospitals: their method of working, physical layouts and working conditions.

2. Scope :

Unit 1

Introduction to Hospitals and Health care facilities – Government Sector, Trust Hospital, Corporate sector – Nursing Homes

Unit 2

Visit to various hospitals (five Hospitals) guided by concerned Faculty and Hospital professionals:

A brief introduction is given by the host hospital on the medical and administrative functions of the hospital. Study of organizational structure and Department Hierarchy with their role. Students while visiting the various departments will observe the physical layout, working conditions. The students write notes on the salient features. Study of Functional study of each department and write a note on the departmental role.

Unit 3

A structured report is prepared by the student on the each hospital visit.

Unit 4

Compilation of the reports into one major report, presentation of the report by the students.

Pedagogy

Students have to visit atleast five hospital of different Category; Government hospital, Trust hospital, single specialty hospital, and corporate hospitals. A Project Report/Journal should contain details of main departments of Hospitals, along with it's location, space requirements, equipment needs, manpower, functions, etc.
