**Appendix X: Best practices (supplementary information for 7.3)** 

#### HEMCHANDRACHARYA NORTH GUJARAT UNIVERSITY 2010-11 BEST PRACTICES -I

#### 1. Title of the practice: Research Initiative

#### 2. The context that required the initiation of the practice

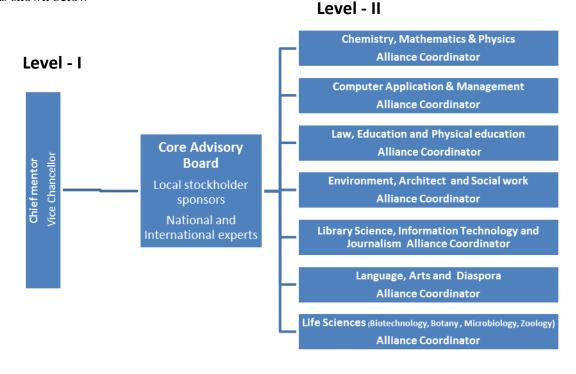

Entry level college and university teachers were had lake of exposure for creating the research proposal. There was a need of creating platform where such teachers can club to gather according to their subject expertise and facilitate to build research proposal and present in that proposal to team of university invited experts for mentoring. Senior teachers were found to have the capacity to build proper research proposal and even get it sanctioned but not having expose to ICT and modern technology available for conduct of research in better way. Thus there was a need of scientific platform which can club this two group to gather in a participatory mode for better research activity in university

#### 3. Objectives of the practice

- To promote the research activity among the University and College teacher
- To provide the in house mentoring for better research proposal building
- To established network with research funding agency
- To provide the technical assistance for research activity
- To provide list of indicative area for research

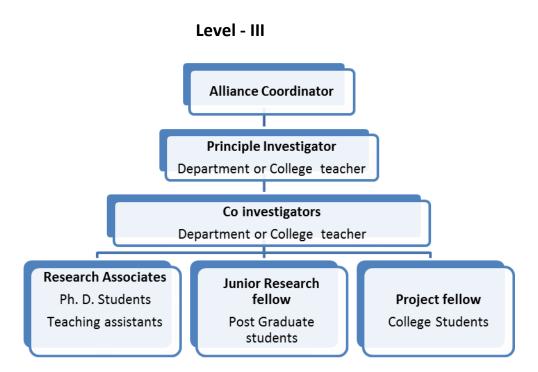

#### 4. The Practice

One day on campus workshop of Research Initiative phase I was organized in presence of VC, all the departmental teaching staff and three off campus experts. The house has gone through the present status of university in research and created the well define three tire research initiative team for promotion of research as shown below

# HEMCHANDRACHARYA NORTH GUJARAT UNIVERSITY PATAN 384 265

Two day Research Initiative phase II was conducted for college and university in which before joining the workshop participant was ask to come with rough proposal. The workshop was included the funders meet was organized and various representative from the state level funding agency were invited to discuss the expectation of funding agency along with scope and opportunities for funding. During two days proposal were mentored by invited expert. We have provide the enough scientific writing support and computerization and at the end of workshop 37 research proposal were submitted to various funding agency.

#### 5. Obstacles faced if any and strategies adopted to overcome them

As the alliance coordinator we have kept more the middle level teachers for which initially mild resistance and was observed by senor faculty which was resolved automatically after the phase II and even they have also participated for further working

Seven alliances in relative subject group were found still more generic by participant and more specialization was demanded by the participant.

Participant were in demand of getting immediate pilot project at the end of workshop as output So we have started mechanism to provide seed money from university own fund in next year.

#### 6. Impact of the practice

37 proposals were submitted to various funding agency at the end of Phase II workshop. Research culture and interdisciplinary research interest group was created. Research proposal were discussed and mentored by expert so chances of approval of research proposal were increased and the end of academic year may of proposal were found to be approve for the funding

#### 7. Resources required

- Computer lab with Internet connection

#### HEMCHANDRACHARYA NORTH GUJARAT UNIVERSITY 2010-11 BEST PRACTICES -II

1. Title of the practice: Creation of CLOUD IQAC

#### 2. The context that required the initiation of the practice

Internal Quality Assurance Cell (IQAC) is a mandatory body to be remains active as a post accreditation quality sustenance activity in all the NAAC accredited institution. The function IQAC is diverse include the planning, monitoring and reporting for entire university, which require the mechanism to get regular updates from all the faculty members and teaching departments. The traditional working with paper based system or with only e mail was found not sufficient to meet with IQAC management challenges. There was found a need of centrally operated and on line accessible system for IQAC related work.

#### 3. Objectives of the practice

- To provide central facility to store all the IQAC related data
- To provide online access to all the faculty members to update their activity on line
- To provide automatic data gathering and analysis system
- To provide facility for uploading research publications by faculty member
- To save the paper, energy and time

#### 4. The Practice

University has taken special web space for this purpose. We have gone through the survey of best university websites for creating the design of the portal. The dynamic website was created in open source content management system DRUPAL available freely. All the staff members and Departmental heads were given the User ID with access right to contribute in their own and departmental web pages. Web site was furthered facilities the combining data in categorized view with search facility. The portal was also accommodating information from the various committees like Research initiative, Industry Interaction Cell, etc. The portal was also having facility to take online feedback. The resource documents and other required documents were also placed in portal. All the staff members were given training for using the portal and feedback was taken for further improvement of the portal.

5. Obstacles faced if any and strategies adopted to overcome them

Staff resistance was observed for portal usage but that was resolved after 2-3 session of training and keeping online help material

#### 6. Impact of the practice

Cloud office was created for IQAC working anytime anywhere. Auto live update of from all the faculty members was done. Healthy competition was created among staff members and departments due to online listing and online appreciation of activity done by staff. We were able to save paper energy and time for IQAC functioning. We were able to perform benchmarking easily for key point. Better input for AQAR preparation.
